SUMMARY

Aspiring Frontend Developer with strong knowledge of JavaScript and React. Focused on building interactive and responsive web applications using modern React concepts. Continuously improving skills through hands-on projects and real-world problem solving. Comfortable working with components, state management, and API integration.

EDUCATION

Bachelor in Computer Engineering : Purwanchal Campus IOE,TU

High School (Computer Science) :Kathmandu Model Secondary School, Kathmandu

SKILLS

Programming Languages: JavaScript, Python , C ,C++

Frontend Development: HTML, CSS, React.js

Tools & Platforms: Git, GitHub ,Hugging Face, visual studio code

PROJECTS

TrendMorph ([link](#))

JavaScript, React.js, Node.js, Express.js, MongoDB, Python (AI models integration)

- Developed an AI-powered platform that analyzes real-time social media trends from platforms like YouTube, Reddit, Pinterest, and X (Twitter).
- Generates multimedia content including captions, hashtags, AI-generated images, blogs, voice-over audio, and speech-to-text outputs.
- Integrates advanced AI models such as Stable Diffusion XL (SDXL), BLIP, T5, Whisper, and LangChain for automated content creation and trend-based recommendations.

Smart Face Attendance System ([link](#))

html,css,javascript,Python, Django, OpenCV, SQLite

- Developed a Django-based attendance system using OpenCV for real-time face detection and recognition.
- Automated attendance marking by identifying students through webcam-based face recognition.
- Implemented date-wise tracking with separate records for morning, afternoon, and total attendance.

Student Management System ([link](#))

HTML, CSS, JavaScript, PHP, MySQL

- Developed a web-based application to manage student records, including adding, viewing, filtering, deleting, and exporting data in CSV format.
- Implemented course-wise attendance tracking with present/absent marking, attendance reports, and export functionality.
